KTS features a broad array of capabilities including software application development, systems design and integration, engineering and technical consulting services, and IT staff augmentation. The company's innovative products and services revolve around distinct divisions comprised of Logistics, IT Staffing, Systems/Software Development, Network Communications/Security, and IT Infrastructure.

PAST PERFORMANCES

As a MWOSB, KTS has been providing service of excellence in Integration, Development, and Administration aligned with the Full Life Cycle methodologies. We provide subject matter expertise in IT from engineering, integration and modernization, to development and support.

Many companies have utilized our services in their effort to support their major DoD customers: U.S. Army, Joint Chiefs of Staff, and FDIC.

Federal Deposit Insurance Corporation

KTS personnel provide Tier II level support, SharePoint Subject Matter Expertise and Development for the agency's SharePoint portal, and Project Manager services to their on-going projects.

KTS consultants provided Project Management that provided two-token factor authentication solution, centralized event logging, and on-going SharePoint customization projects. KTS technical consultants provided Subject Matter Expertise in SharePoint engineering and development in support of FDIC's migration as well as custom solutions utilizing SharePoint Designer, InfoPath forms, custom workflows, and JavaScript, JQuery, and C# programming.

Joint Chiefs of Staff

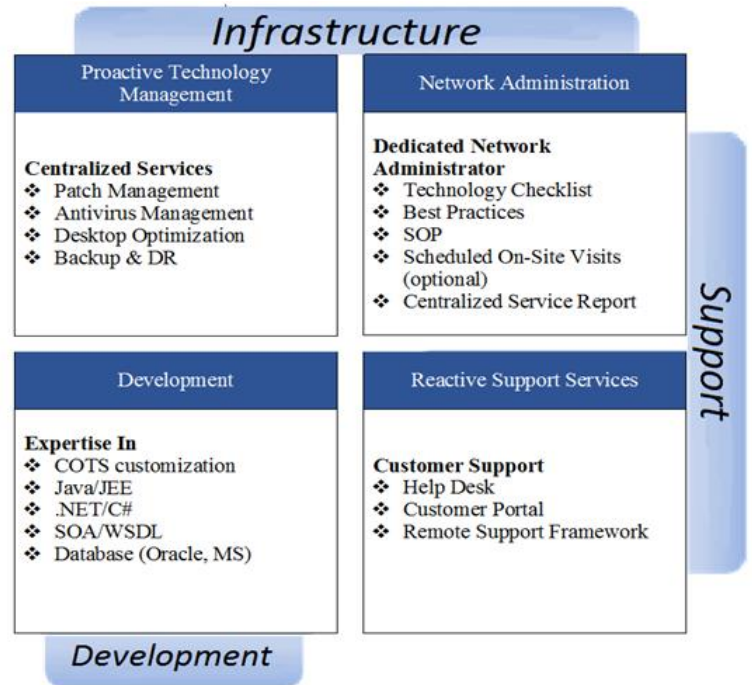

KTS personnel provide Tier II and III level support, SharePoint Subject Matter Expertise and Development support for their Form Generation utilizing .NET/C# along with third-party API APOSE. KTS consultants have also developed a middleware solution to interface with DMDC user database to provide Single Sign-On solution with CAC authentication to provide access to external users. KTS consultants have also led the effort in providing COOP capability to their SIPR SharePoint solutions utilizing MS SQL Servers log shipping. KTS consultants have also provided Portal development to Joint Chiefs of Staff utilizing JSR-168 portlets for Vignette Portal. KTS consultants have been integral member of the development and engineering team in providing Joint Chiefs of Staff enterprise level solutions, which are currently running in their SIPR and NIPR networks.

U.S. Army

KTS personnel provided U.S. Army solutions based on Java/J2EE framework and methodologies, such as STRUTS in combination of COTS software: WebLogic, CA eTrust, WebSphere, Apache, SiteMinder, etc.

KTS provided expertise in COTS integration and development of solutions to provide U.S. Army Human Resources Command User Registration System (HURS) (References: [US Army HRC User Registration System](#)). This solution, developed by KTS personnel and released in 2007, was a huge success in providing the field with auto provisioning to Army resources. This solution has been active until 2013 when it was decided to be migrated to the new Identity Management System (IMS) in May 17, 2013 (reference: <http://www.army.mil/a/102139/sr>).

KTS has also provided the U.S. Army with the Officers Selection Preference Page that contained four modules: Command Preference Designation (CPD), Career Field Designation (CFD), Functional Area Designation (FAD), and Senior Services College (SSC). This solution was provided by KTS personnel utilizing third-party COTS software, ATG Dynamo, but later migrated to WebSphere platform, which was also developed by KTS personnel.

KTS Comprehensive Support Offering
